Atishh Amte

2x Founder | Entrepreneurial Problem Solver | Your Growth Expert
Pune, Maharashtra, India

Summary

As a seasoned engineer with over 12 years of experience across a range of industries, including education, auction, insurance, e-commerce, real estate, media, and finance, I have a proven track record of delivering innovative and scalable solutions that address real-world issues. My passion for creating user-friendly and effective technology solutions has been a driving force throughout my career, and I'm constantly seeking new ways to push the boundaries of what's possible.

As a responsible team leader and colleague, I bring a wealth of business and people psychology knowledge to the table. I enjoy working with teams to achieve their goals, and my experience has taught me the value of effective communication and collaboration in driving success.

Whether I'm conducting research on cutting-edge technology or unwinding with a video game, I'm always looking for new ways to broaden my horizons and stay ahead of the curve.

In my freelance Information Technology (IT) Consultant role, I provide a wide range of services to businesses looking to optimize their technology infrastructure, systems, and applications. With my expertise in areas such as CTO as a service, SaaS development, scaling, application building solution, web development, and migration, I'm able to deliver tailored solutions that meet the unique needs of each client.

My problem-solving and analytical skills are among my strongest assets, and I pride myself on being able to tackle complex challenges and develop creative solutions. I have excellent communication and interpersonal skills, which I use to build strong relationships with clients and stakeholders. I'm adept at working independently and managing projects effectively, with a

strong attention to detail and the ability to juggle multiple projects simultaneously.

Overall, my background in engineering, combined with my passion for innovative technology solutions and my expertise in IT consulting, make me a valuable asset to any organization looking to drive success through technology.

Competencies:

Web Development: HTML, Cascading Style Sheets, JavaScript, AJAX, PHP, CodeIgniter, MySQL, Databases, Object-Oriented Programming, Web Development, Web Services, Web Technologies

Software Development: API Development, Software Development, Product Development, AWS, VPC, SVN, Git, Linux

Team Management: Customer Relationship Management, Team Building, Team Management

Project Management: Scrum, Agile Methodologies, Agile Project Management, Business Development, Project Management, Product Management, Software Development Life Cycle

Experience

Self Employed

Freelance Information Technology Consultant

April 2017 - Present (6 years 2 months)

Pune, Maharashtra, India

I offer a wide range of services as a self-employed information technology (IT) consultant to assist firms optimize their technological infrastructure, systems, and applications.

- Demonstrated expertise in web development, migration, application building solutions, scaling, CTO as a service, and SaaS development.
- Excellent analytical and problem-solving abilities.
- Strong interpersonal and communication abilities.
- The capacity for independent work and efficient project management.
- Excellent attention to detail and the capacity to manage several projects at once.

Responsibilities:

- Provide clients with advice on IT strategy, including CTO as a service, in order to align it with their company goals.
- Create and deploy SaaS development and other cloud-based software solutions to satisfy client needs.
- As clients' businesses expand, work with them to scale their IT infrastructure, systems, and applications.
- Create unique software solutions, such as application building solutions, to satisfy clients' particular business demands.
- To improve clients' online presence, we design, create, test, and deploy websites, including web development and optimization.
- Offer migration services to assist organizations in moving their IT infrastructure and software to new environments or platforms.

seQR

Founder

January 2023 - April 2023 (4 months)

Pune, Maharashtra, India

- Developed and launched an innovative augmented reality-based platform, seQR, that provided QR code-based solutions to businesses in the interior decoration, real estate, and education sectors.
- Successfully distributed the platform to 15+ businesses, resulting in a significant increase in efficiency and customer satisfaction.
- Led a team of 2 employees to develop and maintain the platform while identifying potential clients and partners through market research, resulting in increased sales and partnerships.
- Negotiated and closed a successful deal to sell the company to a service-based organization, resulting in a profitable exit for the company and its shareholders.
- Oversaw the transition and handover process to ensure a smooth and efficient outcome for both seQR and the acquiring company.
- Demonstrated the ability to develop and launch a successful product, lead a team, conduct market research, and negotiate successful deals, while achieving a profitable exit for the company.

Nua (Lagom Labs)

Senior Engineering Manager

April 2022 - February 2023 (11 months)

Mumbai, Maharashtra, India

As a skilled engineering manager and division lead at Nua, I am responsible for overseeing end-to-end feature development. My role involves collaborating with PMs, Engineering Managers, and other stakeholders to design the architecture, maintain tasks, and ensure timely releases. Here are some highlights of my experience:

- Project Management: I have experience managing projects and divisions, ensuring timely delivery of features and maintaining project schedules.
- Technical Expertise: I have expertise in various technologies, including Magento (PHP), NodeJs, VueJs, and Golang, and am proficient in using MySQL as our primary database and Redis as the caching and session storage engine. Additionally, I have experience with AWS technologies such as Lambda and Step Functions, which we use in our downstream systems to ensure optimal performance and scalability.
- Mentoring: I take pride in mentoring and supporting fresh developers and interns to help them succeed.
- Talent Acquisition: I play a key role in identifying and hiring top talent to join our team.
- Analytics: Our team has worked on exciting internal analytics projects using PostgreSQL and Python, demonstrating our ability to deliver innovative and scalable solutions.
- Team Leadership and Management: I have strong leadership skills and am capable of managing a team effectively to achieve project goals.
- Product Management: I have experience in product management, which allows me to take a customer-focused approach to feature development.
- Team Building: I have the ability to build strong relationships and foster a positive team culture.

In summary, my experience in project management, technical expertise, mentoring, talent acquisition, analytics, team leadership and management, product management, and team building enables me to deliver innovative and scalable solutions that meet the needs of clients and customers.

mindU Health

Vice President Of Technology

June 2021 - April 2022 (11 months)

Mumbai, Maharashtra, India

As a technology leader at mindU Health, a prominent mental wellness organization, I had the opportunity to play a critical role in the organization's growth and success. Here are some highlights of my experience:

- Led the entire technology department, responsible for the development of enterprise-level products and creating roadmaps for the company's growth.
- Developed two of the company's most successful products:
 - > A comprehensive platform for users to search for and connect with mental health professionals for 1-1 video conferencing sessions to address their mental health concerns.
 - > A vibrant social media platform and community for users to post about their mental health issues, seek solutions, and participate in anonymous discussions.
- Contributed to the company's positive impact in the mental wellness space, which remains a passion of mine.
- Despite unforeseen funding issues, remained proud of the groundbreaking work accomplished at mindU Health.

B2Connect

Co-Founder & CTO

May 2020 - December 2021 (1 year 8 months)

Mumbai, Maharashtra, India

As the Co-Founder and CTO of B2Connect, I played a crucial role in building and managing the technology infrastructure of the organization. B2Connect was a business-to-business (B2B) platform that offered a range of services to streamline the managing and selling the products directly to customers via mobile application.

Some of my key responsibilities and accomplishments at B2Connect included:

- Developing and managing the technology roadmap for the organization to ensure timely delivery of products and services.
- Leading the development of an innovative platform that connected buyers and suppliers, enabling them to conduct business more efficiently.
- Building a highly skilled technology team and providing mentorship and guidance to ensure their success.
- Implementing agile development methodologies and best practices to streamline the software development process.
- Collaborating with cross-functional teams, including sales, marketing, and operations, to deliver products and services that met customer needs.
- Participating in fundraising efforts and securing investments to support the growth and expansion of the organization.

edobo

Fulltime consultant / Technology Head

January 2021 - May 2021 (5 months)

Mumbai, Maharashtra, India

As a key technology decision-maker at Edobo, I oversaw all aspects of Business Tech, project development, and product process flow, server procurement, networking administration, DevOps, and Infrastructure. Here are some of my major accomplishments:

- Led the development of several key products that contributed to Edobo's success, including our B2C e-commerce platform that seamlessly integrated web and mobile apps, and our API integrations with multiple third parties for WMS, Analytics, and Reporting.
- Played a pivotal role in architectural decisions regarding third-party API development, contributing to the overall success of the platform.
- Led the migration of our Magento CE platform to a MicroService architecture, a complex project that required significant effort and coordination. Despite the challenges, my team and I successfully delivered it within an impressive five-month timeline.
- Implemented best practices in project management and development, ensuring timely delivery of high-quality products and features.
- Collaborated effectively with cross-functional teams, including business stakeholders, product managers, and other key decision-makers, to ensure alignment and success of technology initiatives.
- Provided leadership and guidance to my team members, mentoring them and helping them to grow professionally.

I am proud of my contributions to Edobo's success and remain committed to creating scalable, innovative, and user-friendly solutions that address real-world issues. My skills include:

- Project management and development
- Business Tech strategy and execution
- Architectural decision-making
- Cross-functional collaboration
- Mentoring and leadership

Passwork

CTO

May 2020 - December 2020 (8 months)

Mumbai, Maharashtra

As the technology decision-maker at Passwork, a leading aggregator of co-working spaces in India, I had a multifaceted role overseeing Business Tech, project development, product process flow, server procurement, networking administration, DevOps, and Infrastructure. During my tenure, I made significant contributions to the company's success by leading the development of several key products, including:

- B2C co-working spaces aggregation platform: This platform, which was seamlessly integrated with web and mobile apps, enabled customers to easily search for and book co-working spaces that met their needs. The platform was designed with a user-friendly interface, intuitive search functionality, and robust booking and payment systems.
- B2B lead generation and operation portal: This portal enabled Passwork to efficiently manage its relationships with co-working space providers, streamlining lead generation, onboarding, and ongoing operations. The portal also included powerful analytics and reporting features, enabling Passwork to make data-driven decisions and optimize its processes.
- Third-party API integrations: To enhance the functionality of our products and improve the customer experience, we integrated with several third-party APIs, including Maps, payment gateways, and customer service tools.

Unfortunately, the Covid pandemic hit shortly after I joined Passwork, severely impacting the company's revenue. In December 2021, the company had to halt its IT department function due to a cash crunch and no revenue inflow. Despite this setback, I am proud of the groundbreaking work my team and I accomplished at Passwork. Our products delivered innovative solutions to co-working space customers and helped drive the company's growth.

FynTune Solution

Vice President Of Technology

December 2017 - April 2020 (2 years 5 months)

Mumbai Area, India

At Fyntune, a leading SAAS and PAAS-based outsourcing company specializing in multi-domain insurance platforms, I was responsible for driving all technology decisions related to projects and product process flow, server procurement, networking administration, DevOps, Infrastructure, and Security guidelines.

During my tenure, I led the development of several cutting-edge products, including:

- The online insurance web aggregator platform, offered as both SAAS and PAAS services, which seamlessly integrated web and mobile apps and delivered an enhanced user experience.
- The Employee Benefit platform, which provided employers with a robust tool to manage employee benefits and streamline the process.
- An Android application infrastructure and implementation, which enabled Fyntune to offer its services to Android users.
- An AI-based CRM, which helped Fyntune's sales and customer service teams to work more efficiently.

As the head of the Centre of Excellence department, I spearheaded new innovations and R&D efforts, which included:

- Deploying CI-CD for all projects to ensure timely deliveries, improve quality, and reduce manual efforts.
- Implementing custom API gateways to enable seamless communication between different components of the system.
- Creating extensions to secure PHP code, which provided an additional layer of security to the system.
- Automating server hardening and application deployment procedures using VMs and shell scripts, which improved efficiency and reduced the risk of human error.

In addition to my technical leadership, I also served as the CISO, developing and implementing security audit and implementation documents to ensure the protection of sensitive data and intellectual property. My efforts helped Fyntune achieve compliance with industry standards and maintain a strong security posture.

Ad Space Mart Pvt. Ltd

Project Manager

February 2017 - December 2017 (11 months)

Mumbai Area, India

As a project manager, I was responsible for leading and managing an IT team and other resources to deliver successful projects on time and within budget. I implemented agile methodologies, including daily SCRUM stand-

ups, to maintain tight deadlines and ensure effective collaboration among team members.

In addition to my leadership role, I was also involved in the technical aspects of the projects. I had experience in handling server technologies and development workflows, which enabled me to design and implement efficient workflows that optimized the development process.

Here are some specific highlights of my accomplishments:

- Led a team of developers and ensured successful project delivery on time and within budget.
- Implemented daily SCRUM stand-ups to maintain deadlines and ensure effective communication among team members.
- Designed and implemented workflows that optimized development processes, resulting in increased efficiency and productivity.
- Managed server technologies and ensured the smooth functioning of the IT infrastructure.
- Worked closely with clients to understand their requirements and provide customized solutions to meet their needs.
- Led cross-functional teams to deliver complex projects on time and within budget.
- Collaborated with team members to develop innovative solutions that enhanced the overall quality of the product.
- Maintained up-to-date knowledge of emerging trends and technologies in the industry, which helped me to make informed decisions regarding project planning and execution.

PolicyMantra Insurance Web Aggregator Pvt. Ltd.

2 years 4 months

Project Manager

June 2016 - January 2017 (8 months)

Vashi

As a seasoned Project Manager, I have gained extensive experience in leading IT teams and managing resources to ensure successful project completion. My daily routine includes conducting SCRUM stand-up meetings to maintain project timelines, ensuring adherence to the development workflow and managing server technologies.

Here are some of my notable achievements:

- Successfully managed a team of IT professionals, ensuring timely and accurate delivery of projects.
- Designed and implemented project workflows to streamline development processes, which resulted in increased efficiency and improved project delivery timelines.
- Led the implementation of server technologies, including server virtualization, cloud infrastructure, and database management systems, to ensure optimal performance and reliability.
- Conducted daily SCRUM stand-up meetings to track project progress, identify and address any roadblocks, and ensure timely delivery of projects.
- Developed and maintained strong relationships with stakeholders to ensure alignment with project objectives and facilitate smooth communication channels.

As a detail-oriented project manager with a proven track record of delivering successful projects, I am always looking for new challenges and opportunities to utilize my skills and expertise to contribute to organizational success.

Technology Team Lead

September 2015 - May 2016 (9 months)

Vashi

As a technology team lead, I had the privilege of leading an IT team and managing resources to ensure timely project delivery. My focus was on handling server technologies and development workflow, designing and implementing workflow, and conducting daily SCRUM stand-up meetings to maintain deadlines.

Here are some of my key achievements:

- Team Management: As a team lead, I was responsible for managing an IT team and other resources to ensure efficient project delivery. I provided guidance and support to team members and collaborated with them to achieve project goals.
- Workflow Design and Implementation: I designed and implemented effective workflows that optimized project timelines and ensured high-quality deliverables. I continuously evaluated workflows and processes to identify areas for improvement and implemented changes as needed.

- SCRUM Stand-Ups: I conducted daily SCRUM stand-up meetings to ensure that my team members were aligned and working towards meeting project deadlines. I monitored progress and provided regular updates to stakeholders.

- Server Technology: I handled various server technologies and ensured that they were properly maintained and updated. I managed servers to ensure that they were running efficiently and securely.

As a technology team lead, I worked closely with cross-functional teams to ensure project success. I also stayed up-to-date with the latest technologies and trends to ensure that my team was using the most effective tools and processes. Overall, I am proud of my contributions to my team's success and my ability to lead and manage resources effectively.

Senior Software Engineer

October 2014 - August 2015 (11 months)

Vashi, Navi Mumbai

As a Senior Software Engineer, I have played a vital role in leading teams and managing resources to ensure successful project delivery. My experience includes:

- Team Management: I have effectively managed IT teams and resources to maintain project deadlines and ensure quality deliverables. I have worked closely with team members to identify individual strengths and weaknesses, and have implemented strategies to optimize productivity.

- Agile Methodology: I have extensive experience using Agile methodologies, including daily SCRUM stand-up meetings, to maintain project timelines and ensure successful product delivery.

- Server Technologies: I have managed server technologies, including deployment and maintenance of server infrastructure, to ensure optimal performance and scalability.

- Development Workflow: I have designed and implemented effective development workflows, including version control and continuous integration/continuous deployment (CI/CD) processes, to streamline development and ensure high-quality code.

- Workflow Design: I have designed and implemented effective workflows for projects, ensuring that all stakeholders are aligned and tasks are clearly defined. By identifying bottlenecks and implementing solutions, I have been able to improve productivity and reduce time-to-market.

In my role as a Senior Software Engineer, I have leveraged my technical expertise and leadership skills to manage teams, maintain timelines, and deliver successful projects.

Salasar Core Solution Pvt Ltd

Php Web Developer

September 2013 - September 2014 (1 year 1 month)

Mumbai Area, India

As a PHP Web Developer, I have had the pleasure of working with some of the most innovative and forward-thinking organizations in the tech industry. My expertise in using technologies such as Core PHP, CodeIgniter, MySQL, VPS and Dedicated Server, Git, SVN and Code Review has allowed me to create highly responsive and user-friendly web applications that drive business growth and user engagement.

Some of my key accomplishments and responsibilities in this role include:

- Developing custom web applications using Core PHP and CodeIgniter frameworks, resulting in efficient and high-performing software solutions.
- Collaborating with cross-functional teams to gather business requirements, design and implement scalable solutions, and ensure timely project delivery.
- Managing MySQL databases, including schema design, data migration, and optimization for high-performance web applications.
- Deploying web applications to VPS and Dedicated Servers, configuring Apache and Nginx servers, and optimizing server performance to ensure smooth operation of web applications.
- Using Git and SVN for version control and implementing code review processes to ensure code quality and adherence to coding standards.
- Designing and developing RESTful APIs and integrating them with web applications to facilitate seamless data exchange.
- Collaborating with front-end developers to implement responsive web design and ensure consistent user experience across all platforms and devices.
- Staying up-to-date with the latest web development trends and best practices, and continuously improving my skills and knowledge to deliver cutting-edge web applications.

My experience as a PHP Web Developer has equipped me with a diverse skill set and a deep understanding of the intricacies of web application development. I am confident in my ability to deliver high-quality software solutions that exceed expectations and drive business growth.

Jay Softwares

Software Engineer

June 2011 - August 2013 (2 years 3 months)

Mumbai, Maharashtra, India

As a Software Engineer, I have expertise in various web technologies and have developed several successful projects using core PHP, CSS, JavaScript, Bootstrap, MySQL, SVN, and code review. I have a proven track record of delivering high-quality work and meeting project deadlines.

Here are some highlights of my skills and experience:

- Expertise in Core PHP: I have a deep understanding of PHP and have worked on multiple projects using this technology. I have experience in writing efficient and optimized code, as well as integrating it with other web technologies.
- CSS and Bootstrap: I am well-versed in CSS and the Bootstrap framework. I have used these technologies extensively to create visually appealing and responsive web pages.
- JavaScript: I have experience in using JavaScript to create interactive web pages, implement client-side form validation, and perform other essential functions.
- MySQL: I have a strong command of MySQL and have used it in several projects to store and retrieve data efficiently.
- SVN: I am proficient in using SVN for version control and have used it to manage code changes across multiple developers in different locations.
- Code Review: I have experience in conducting code reviews and ensuring that the code adheres to industry standards and best practices.

In addition to my technical skills, I have developed various projects like inventory management system, courier management system, and hospital management system. These projects demonstrate my ability to understand and fulfill client requirements, create efficient workflows, and develop scalable applications.

I am a dedicated and proactive professional who is passionate about technology and committed to delivering high-quality work. I am always eager to learn and explore new technologies to enhance my skills and knowledge.
